Pawishrajhen A R

AI Engineer | Machine Learning Engineer
pawishgpt@gmail.com | Glasgow, United Kingdom | LinkedIn | GitHub | Portfolio

Professional Summary

AI Engineer with startup experience shipping Generative AI, computer vision, and LLM systems to production clients. IEEE-published co-author who owns the full path from model development and RAG pipelines to REST APIs, deployment, and client handoff.

Education

University of Glasgow — Glasgow, United Kingdom
MSc in Data Science — *Sep 2026 – Sep 2027*

SRM Institute of Science and Technology — Chennai, India
B.Tech in Artificial Intelligence; CGPA: 8.44/10 — *Jun 2022 – May 2026*

Professional Experience

Technical Lead — Jan 2025 – Present
KatalyzU — digital studio shipping websites, business software, and AI products — *Remote*

- Own technical delivery for client builds across web, mobile, and AI automation on fixed 7- and 30-day timelines.
- Designed Skanda, a multi-tenant billing backend (FastAPI, PostgreSQL) with tenant-scoped ledgers, auth boundaries, and documented REST APIs.
- Delivered The Fuel Depot, a production fuel-delivery platform (React Native field app, admin dashboards, invoicing, live tracking) that replaced paper reconciliation for a Nigerian operator.
- Built and maintain katalyzu.com (Next.js), the studio's public site and client-intake flow.

Freelance AI & Software Engineer — 2025 – Present
Independent / Contract (via KatalyzU) — *Remote*

- Delivered fixed-scope client projects — marketing sites, admin portals, and internal tools — with full source handoff.
- Built workflow automations and third-party API integrations for founders and small teams.

Featured Projects

FieldAuth | *React Native, Expo, SQLite, Offline Auth* | GitHub
- Built offline face auth with liveness, encrypted SQLite records, GPS attendance, and sync-ready APIs.

RAG DocChat | *FAISS, Sentence Transformers, Ollama Phi3, Streamlit, OCR* | GitHub
- Built local RAG Q&A for PDF/DOCX/TXT with hybrid search, OCR, and source-cited answers.

BigData E-Commerce | *Spark, Airflow, PostgreSQL, MySQL, MongoDB, Tableau* | GitHub
- Built an e-commerce analytics platform with ETL, warehouse modeling, Spark analytics, and Tableau BI.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, SQL, C
AI / ML: PyTorch, TensorFlow, OpenCV, YOLO, Scikit-learn, XGBoost, Computer Vision, NLP
LLMs & GenAI: Hugging Face Transformers, LLaMA, Ollama, RAG, FAISS, Agentic AI, Model Context Protocol (MCP)
Backend & Frontend: FastAPI, Flask, Node.js, Express, REST APIs, OpenAPI, React, Next.js, React Native, Streamlit
Databases & Cloud: PostgreSQL, MySQL, Firebase, Supabase, Google Cloud Platform, Vercel
DevOps & Tools: Git, Docker, Linux, Jupyter

Publications

- **ReMindAR: Adaptive AR Memory Assistance for Dementia Patients** — co-author; IEEE ICIMA 2026; 82.33% reminder-classifier accuracy. IEEE Xplore
- **Hybrid ARIMA–LSTM Forecasting of Ocean Acidification and Hypoxia** — research lead; IJLRET. DOI

Achievements: RPC 2024 Finalist (Top 12 / 1,000+); HyperVerge Finalist (Top 30 / 200+); Hackheist 2024 Finalist.
Certifications: Machine Learning (Coursera); Oracle OCI Foundations & Data Foundations Associate; Intel Unnati AI + IoT.
